ABOUT CLASSIC GRANULES

Key Performance Characteristics

- Economical system.
- Unparalleled durability / Life cycle costs over consistency & weather.
- Fully 100% Post-consumer recycled.
- Mondo has dedicated supply chains designated in key areas throughout North and South America.
- These supply chains must conform to Mondo's high production and consistency standards.
- Mondo requests that recycling facilities are ISO 9001 quality control certified.
- Granulometry of Mondo's SBR infill is to specific proprietary parameters that ensure consistency across production runs.
- All contaminants are removed during the granulation process including all deposits of steel and other fiber.
- Double aspiration process ensures a "dust free" final product.
- Shock absorption - prox 60%.

ABOUT MONDO CARPET

New generation fibers that provide durability, performance and playing characteristics similar to natural grass.

- New high quality polymers.
- Highly durable but not abrasive—skin friendly.
- Greater elastic memory ensures the fiber will retain its appearance and not deform even after many years of use.
- New UV protector extends life of the fiber and provides greater color stability.
- New three layer primary backing and heavy weight, heat activated polyurethane secondary backing improves dimensional stability of the system.
