## SOLID RUBBER WEAR LAYER

• **Solid rubber wear layer provides unparalleled durability and life cycle costs.**

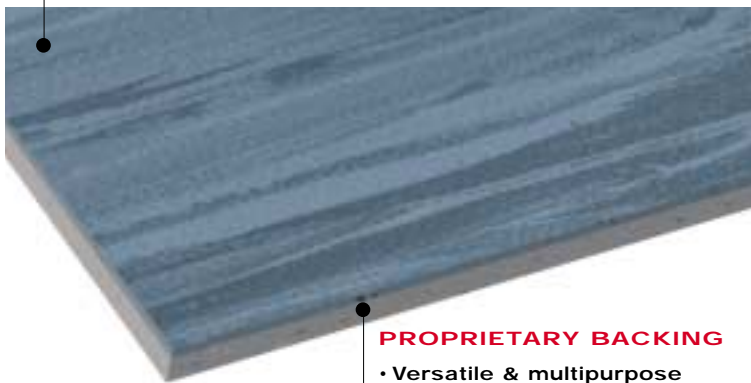

• **Highly durable**  
Vulcanized rubber is a strong and durable material, our surface layer will last longer than any other surface available on the market.

• Designed to withstand heavy traffic and abuse of multipurpose activities.

• Non porous surface that requires **no coatings** and can be maintained with straightforward maintenance.

• **Wet or Dry Slip Resistance**  
Exceeds ADA requirements (ASTM D-2047).

• Antibacterial & Antimicrobial Throughout.

## PROPRIETARY BACKING

• **Versatile & multipurpose**

Point-load resistant allowing gymnasium to be used for all types of activities.

• Solid rubber backing with **post industrial recycled content.**

• **Increased shock absorption and outstanding energy return.**

Due to dual durometer construction that provides a more resilient underlayment.

• **Point-load resistant**

Due to the resiliency of rubber composition increased capacity to withstand static and rolling loads consistent with multipurpose applications.
